Pre-school education in Roosendaal

FOR YOUR CHILD'S BEST DEVELOPMENT

Roosendaal

Your child's early years are very important. Your child grows, enjoys learning and quickly discovers new things. While playing, your child discovers the world and language. This usually happens easily and quickly, but sometimes a child can use some extra help.

WHAT IS PRE-SCHOOL EDUCATION?

At the consultation bureau, your child between 2 and 4 years old can get a referral for pre-school education. A staff member at the consultation bureau will assess whether this would be right for your child.

The purpose of pre-school education is to offer toddlers extra help in their development. This takes place in a group together with other toddlers and specially trained pedagogical staff. This development prepares him or her well for primary education. So your child has a good start!

Your child plays with peers and with toys they also learn from, and participates in the learning activities offered:

- ✓ Your child practises language: talking, listening, playing and moving together;
- ✓ Your child gets used to the structure and rhythm of a day like at primary school;
- ✓ Your child learns social skills, such as waiting your turn and sharing with other children.

If your child has received a referral from the consultation bureau, he or she will attend pre-school education for 16 hours a week. This is spread over a number of half-day sessions.

WHERE CAN MY CHILD ATTEND PRE-SCHOOL EDUCATION?

On the rear side of this leaflet you can see all the locations where you can go for pre-school education. There is often a location near you.

Do you see a location that appeals to you? Then contact the location. You can then ask questions or schedule a visit to experience the atmosphere.

WHAT DOES PRE-SCHOOL EDUCATION COST?

Often the costs are largely reimbursed by the municipality. The nursery or day-care centre can tell you more about this. The costs of pre-school education depend on your personal situation, such as your income and whether you work.

HOW CAN I REGISTER MY CHILD FOR PRE-SCHOOL EDUCATION?

Does your child receive a referral for pre-school education from the child health-care centre? Then you register your child on the website of your childcare organisation. The childcare organisation will then contact you.

You can arrange to drop by for a tour or ask your questions.

AS A PARENT, WHAT CAN I DO MYSELF TO HELP MY CHILD?

As a parent, you are very important in your child's development. For example, you can read them a story, read together, play together, draw together or sing together.

WHO CAN SUPPORT ME IF I HAVE OTHER QUESTIONS ABOUT PRE-SCHOOL EDUCATION OR ITS COSTS?

Do you have any other questions about pre-school education? Or do you need help finding a suitable location for your child?

Our toddler consultants are happy to share ideas with you!

THE TODDLER CONSULTANT SHARES IDEAS WITH YOU!

The toddler consultant is someone who can give you information on what you can do yourself to improve your child's speech and language. The toddler consultant will give you tips and exercises to practise at home with your child.

Visit www.roosendaal.nl/voorschool

or scan the QR code for contact details of the toddler consultants. You can then call or email them.
